PlayStation®

safety instructions

• This disc contains software for the PlayStation® video game console and the PlayStation®2 computer entertainment system. Do not use the disc in other systems, otherwise they may be damaged. This disc conforms to PlayStation® specifications for the PAL market only. It cannot be used in PlayStation® versions with different specifications. Read the operating instructions for the PlayStation® or the PlayStation 2 carefully to ensure correct use. Insert the disc into the PlayStation® with the recorded side down. When handling the disc, do not touch the surface, only the edge. Keep the disc clean and free from scratches. If the surface is dirty, wipe gently with a soft, dry cloth. Do not store the disc near heat sources, in direct sunlight or in a humid environment. Never use discs that are irregularly shaped, cracked, warped, or that have been repaired with adhesive, as this may result in malfunction.

health notice

To protect your health, take a 15-minute break every hour of play. Don't play when you're tired or haven't had enough sleep. Make sure to always play in a well-lit room and sit as far away from the screen as the cable will allow. A very small percentage of people may experience epileptic seizures when exposed to certain lighting effects or light patterns in their daily environment. Sometimes these people will have an epileptic seizure when they watch TV or play video software. Even players who have never had a seizure before may have previously undiagnosed epilepsy. If you have epilepsy, consult your doctor before playing video games. If you experience any of the following symptoms - dizziness, altered vision, muscle twitching or other uncontrolled movements, loss of consciousness, disorientation and/or convulsions - stop playing immediately and consult a doctor.

PIRACY

Unauthorized reproduction of this product or any part thereof, and unauthorized use of registered trademarks is generally a criminal offense. PIRACY harms not only legitimate developers, publishers and retailers, but consumers as well. If you suspect that this product is an unauthorized copy, or have any other information regarding product piracy, please call your local customer service number located on the back cover of this manual.

See last page of manual for Customer Service No. phone number.

Installation

First, install your console according to the instructions in the user manual. Eighth

Always make sure the console is turned off when inserting or removing a disc. If the console is installed and the required peripherals are connected, you will need to download the Disc

Insert "Moorhuhn X" into the disc tray and turn on the console to start the game. We

recommend that you do not insert or remove any peripheral devices or MEMORY CARDS while the console is on. Just follow the on-screen instructions to complete the game start. Please note that if you have inserted a MEMORY CARD, the last saved game is automatically the will.

Moorhuhn X - That's how it's played

The game principle

The principle of the game can be explained in a few simple words: Shoot as many chickens as you can get in front of the gun in 90 seconds! It's that simple. At least in principle, because in addition to this main task, there are still a few puzzles to be solved and hidden gimmicks to be discovered.

Moorhuhn X can be played with different input devices and in two different game modes. You can find out what the key assignments look like in the following sections.

Playing with the controller

The button assignments of the controllers are identical in both single-player and 2-player mode.

table.

Important: When you start Moorhuhn X, at least one controller must be connected to controller port 1.

Playing with the Analog Controller (DUAL SHOCK)

You can also play Moorhuhn X with an analog controller (DUAL SHOCK). For this you have to activate the analog control with the ANALOG mode switch on your analog controller (DUAL SHOCK).

In the 'Options' menu you can also activate the additional setting 'Vibration' when playing with an analog controller (DUAL SHOCK).

Playing with the mouse

You can also play Moorhuhn X with the mouse. To do this, simply plug your mouse into a controller port before starting the game. In 2-player mode you can of course also connect two mice.

Left mouse button	Shoot
right mousekey	reload
Left and right mouse button simultaneously	pause game

Playing with the synchronized lightgun (G-

Con45) A connected synchronized lightgun is automatically recognized by the game. Just follow any instructions that appear on the screen.

To calibrate the lightgun, you must select 'Lightgun Calibration' from the Options menu and follow the on-screen instructions.

IMPORTANT: A lightgun works best when the room is as dark as possible. You can also adjust the game's brightness under the 'Options' item in the main menu if you have problems operating the lightgun. If you don't get along with any of the three settings, you should adjust the display on your TV a little. Just increase the brightness a bit and reduce the contrast.

Languages and home screen

When you start the game, the intro to Moorhuhn X will be loaded after a short while. You can also cancel the intro by pressing the X button. You will then automatically be taken to the language selection. Here you can choose whether you want to play the English or German version of Moorhuhn X. You can change this selection later via the 'Language' item in the options menu.

After selecting the language, you will be automatically taken to the start screen. Press the START button to bring up the main menu.

main menu

The main menu gives you control of the entire game and you can switch directly between single-player and 2-player mode. A grouse is displayed at the bottom right of the screen in single player mode, and two chickens in 2 player mode. To change the setting, move the cursor to the grouse(s) and confirm with the X button.

Of course, in order to play the game in 2-player mode, a second controller must be connected to your console.

Start Game

If you select this item, the game will start. The old Moorhuhn rules apply here: Aim and shoot as fast as you can!

You have 90 seconds to hunt chickens. You get points for every chicken you shoot down. How many that is depends on how far in the foreground or background a chicken flies. In the order from front to back you get 5, 10, 15 or 25 points credited. Of course, you can't just shoot indefinitely. After 8 shots your shotgun is empty and you have to reload by pressing the O key.

Of course, simply shooting down chickens does not exhaust the possibility of collecting points. To find out how to increase your yield even more, you have to search the landscape and try all possible combinations.

Incidentally, Moorhuhn X also has a hidden bonus level. In order to achieve this, you must score at least 400 points and meet two other conditions, which we will not reveal here. You have to find out for yourself!

If you have played well enough, you can enter your result in the high score list at the end of a game.

Minigames

This menu item takes you to the selection of the additional mini-games that are included on the disc. The games 'Fast Chicken', 'Snail Trainer' and 'Photo Chicken' can also be played in 2-player mode. And of course you can also enter your result in these games in a respective high score list.

Return

1 Player

memory chicken

This game requires brains. First three, later more and more, chickens appear one after the other and disappear again in the same order. After a short time, they all reappear at once. You have to shoot everyone. Since they don't move, aiming isn't a problem. However, you can only shoot the chickens in the order given at the beginning. If you shoot a chicken at the wrong time, it counts as a failed attempt and you lose one of your three lives.

So: WATCH OUT!

Fast Chicken

Like a well-equipped shooting range, chickens emerge from cover in any order. You have to shoot them before they take cover again. Of course, as they do this faster and faster, your task will become increasingly difficult. If you miss a chicken, you lose one of your three lives.

9:39 /

Snail Trainer

You have to get your snail over the given shoo training course. You do this by firing a warning shot into the ground just behind her. The closer your shot is to the snail, the further it hops forward. But be careful not to hit them, because not even the strongest snail shell can withstand it.

photo chicken

In this game, the chickens enjoy a small closed season for once. Chickens keep appearing in the foreground and show pictures. You can only shoot at the pictures and not at the chickens, because that would cost you valuable points. But even with the pictures, not all hits will increase your score. For some pictures you also get points deducted.

options

- Sound

Here you can change the volume of the music and sound effects.

- Controller

Here you can set the sensitivity of your controller and switch the vibration on and off when playing with an analog controller (DUAL SHOCK).

- Lightgun calibration

Of course, you can only call up this menu if you have connected a synchronized lightgun (G-Con45) to controller port 1 or 2 on your

console. Just follow the on-screen instructions to calibrate your lightgun.

- image position

With this menu item you can move the image position of Moorhuhn X on your screen on the vertical and horizontal axis. Simply move the cursor to one of the directional arrows and then press the X button.

- brightness

Here you can change the brightness of the game in three steps according to your taste: 'Normal', 'Brighter' and 'Very bright'. If you want to play with a synchronized lightgun, the brightest setting is recommended.

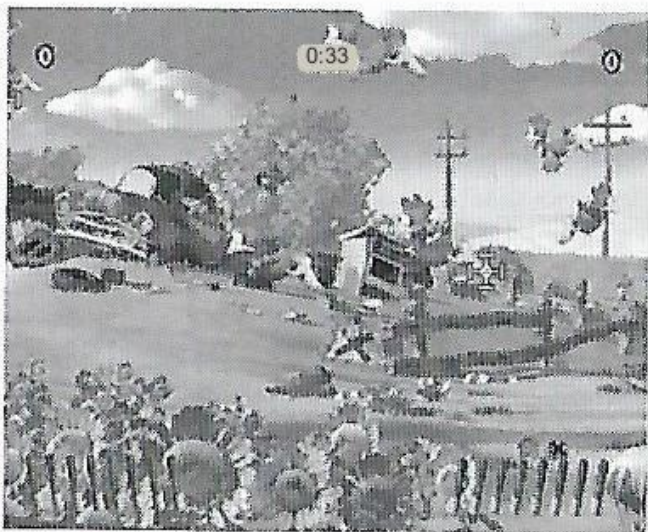

- Language

Here you can switch between the English and the German version and switch on.

If you have changed all settings according to your wishes and select the item 'Back', you can still save your settings on the MEMORY CARD before you return to the main menu.

To enable the save process, you must have a MEMORY CARD in MEMORY CARD slot 1 on your console. Please do not remove the MEMORY CARD during the saving process, as this could result in the loss of your game data. Before starting the game, make sure that you have at least one free memory block on your MEMORY CARD.

When starting, Moorhuhn X automatically loads your previously saved Moorhuhn X data from MEMORY CARD slot 1.

Highscores

This point hides the high score lists of all games, for single and 2-player mode. Move the cursor to one of the yellow arrows and press the button to display the next or previous list. The list of high scores achieved in Moorhuhn X is called 'Original (1/2 player)'.

Credits

Here you can read who worked on the game.

questions upon questions

If you want to find out more about the game, you can find all sorts of information and bonus material for the PC on the website www.moorhuhn-x.de. And on the website www.moorhuhn-world.de you will find all sorts of tips and tricks and you can talk to other players in the forum about the game.
