● Aim of the game

In the year 2296, you will enroll in the Union Academy to become a pilot.

In this world, joining the military is considered an elite social status, so the player must

You will spend two years here aiming to enter an elite course.

Work hard, train yourself and aim to become the pilot you want to be.

Women will be attracted to you and will approach you one after another.

To get a cute girlfriend... No, no, work hard to become an excellent officer.

(This game has multiple endings, so you can play it over and over again.)

story

In the Western 2200s, the unification of nations on Earth progresses,

The "EAA Federal States" centered on Europe, Asia, and Australia, and the "OAS (Organization of American States)" which absorbed most of Africa and part of the Far East.

The two great nations (effectively the United States) were on an equal footing.

This is an era when planetary pollution and population growth have progressed to the point where further development is virtually impossible, and so humanity begins a small-scale but steady space migration.

During this period, on the surface, racial issues were mitigated and racial intermixing was progressing.

Due in part to a decline in mortality rates from disease, the population has reached 10 billion.

However, due to the spontaneous wars that have continued since the last century, the male population has drastically decreased and the number of women joining the military has increased.

The Union Academy, where the player takes place, is located inside the experimental development colony "Hermes," built at "Lagrange Point 1," between the Earth and the Moon.
