CD Shooting Game

TM

**AMERICAN**  
LASER GAMES

## SYSTEM REQUIREMENTS

IBM PC 386 or Compatible Recommended ■ 512 K-RAM with VGA ■ Microsoft Mouse or 100% Compatible Mouse ■ CD-ROM Drive (150 KB per second or greater, continuous to read, 380 ms seek ■ Sound Blaster or 100% Compatible Card ■ DOS 3.3 or Higher

## INSTALLATION

1. Insert the CD into your computer's CD-ROM drive.
2. If you are in Windows, EXIT WINDOWS. Crime Patrol is a DOS game that will not run under Windows.
3. Select the CD-ROM drive from the DOS prompt. If, for instance, the CD-ROM drive is drive D, select the CD-ROM drive by typing "D:" and then pressing the Enter key.
4. At the DOS prompt, type INSTALL and press the Enter key.
5. The install program will first display a box on the screen labeled "Installation Path". The first entry in this dialog box is "CD-ROM Drive". This entry will usually have the correct letter of the CD-ROM drive by default. If you see that the entry does not specify the letter of the CD-ROM drive, adjust it by clicking your mouse on the edit box and typing the correct letter. For instance, if your CD-ROM drive is drive D, the edit box labeled "CD-ROM Drive" should contain "D:\". The second entry in the box is "HardDrive Path". This entry defaults to "C:\CP". If you wish to install the game somewhere else, select this entry with the mouse and change it. On most computers, the C drive will be the drive that Crime Patrol should be installed on. Unless you have a reason to install Crime Patrol somewhere else, you can accept this path by clicking the OK button in the dialog box. If you do make changes to this dialog box, and decide you want to restore the default paths, select DEFAULTS with your mouse.
6. If your Sound Blaster compatible card is not set up correctly, the Install program will ask for some information about your sound card as described below. Otherwise install will skip to 7.
  - A. A dialog box will appear on the screen labeled "Sound Control". It will contain some boxes with multiple selections. The information for these sections depends on how your audio board was installed. Select the appropriate boxes with the mouse based on how the board was installed.
  - B. When finished, select OK with the mouse to continue. DEFAULTS will reset the selections to the standard setup for a Sound Blaster board. CANCEL will exit this dialog.
7. Next, the Install program will display a box labeled "CLICK ON YOUR CD-ROM TYPE". This box has two buttons, one for double-speed CD-ROM, the other for single-speed CD-ROM. Select the button corresponding to the type of CD-ROM installed in your system.
8. At this point, install will display a box labeled "OK to Install?". Selecting OK here will continue the installation, writing files to the location previously specified in the "Installation path" dialog. Selecting CANCEL will abort the install, allowing the user to change the configuration using the pulldown menus on the top line.

## RUNNING CRIME PATROL

To start "Crime Patrol", EXIT WINDOWS, and change to the drive and directory where you decided to install the game (e.g. change to drive C by typing "C:" [Enter], and change to directory C:\CP by typing "cd\cp" [Enter]). Place the CD into the CD-ROM drive. Then run "Crime Patrol" by typing "CP" [Enter]. The game will take a few seconds to load. Then it will begin showing some introductory scenes, which will repeat as long as the game is not being played.

## USING THE MENU

The mouse is used to bring up a menu of options. In the lower left corner of the screen is a button with the word MENU on it. Move the mouse over the MENU button and click on left mouse button to bring up MENU. The game is paused whenever you enter the MENU. The MENU shows several buttons indicating selections. The mouse selects the desired action by moving the cursor over the button and clicking the left mouse button.

**START** — The Start button starts a new game.

**CONTINUE** — The Continue button continues the game. If you haven't already started a game, the demo loop will continue playing. In the middle of a game, the game continues where it left off when you selected MENU. After losing all of your lives, the game will continue where you left off. You will then be given a full complement of lives. Each time you use the Continue button after losing all your lives, your score is reduced. The highest possible score can only be obtained by playing through the whole game with no "continues".

**SAVE** — The Save button will save the current game situation. Only one situation is saved at a time.

**LOAD** — The Load button will load the most recently saved game situation. Select Continue after loading to play the loaded game.

**QUIT** — The Quit button will exit the game back to DOS.

**DIFFICULTY LEVELS** — Three buttons are shown in increasing order of difficulty from Wimp (default), to Rough and Tough.

## PLAYING THE GAME:

The mouse is used in "Crime Patrol" to aim, shoot, and reload the gun. When the mouse is in the video screen, it will appear as a hand gun. The gun is aimed by using the sight on the gun. The gun is fired by clicking the left mouse button. The gun will fire as long as there are bullets. At the bottom right of the screen is an indication of the number of bullets left. When the mouse is moved to the bottom right corner of video screen, the cursor appears as a gun pointing down. At this time, you can reload the gun by pushing the right button of the mouse. Also at the bottom of the screen is the game score, and the indicator for the number of lives left (one life for each badge). After starting a game, by selecting "NEW" from the menu, a set of badges will be shown on the screen. Choose a particular crime scene by "shooting" the badge corresponding to the desired scene. Then get ready to clean up the streets!

**HINTS:** A. Citizens who are not so law abiding will appear on screen. Shoot them before they shoot you.  
If you accidentally shoot an innocent person, you may lose a life.

B. Some scenes will allow you to skip quickly to the next important scene by firing a shot.

## PROBLEM SOLVING:

Crime Patrol is a DOS game. Exit Windows before starting the game. For any problems, check for solutions in the Crime Patrol Help System. To run help, change to the directory where you installed Crime Patrol, and type CPHELP at the DOS prompt.

## TECHNICAL SUPPORT:

Call (505) 880-1718 and request "Crime Patrol Technical Assistance."

## UNINSTALL:

"Crime Patrol" only installs files in the install directory you specify, so to uninstall, just delete this directory and all the files in it.

# CRIME PATROL™

This multi-level live action thriller challenges the player to progress through police ranks battling a variety of criminal elements. As a Rookie, the player takes on gang members, armed robbers and other street criminals. Promotion to Detective will mean working undercover against drug dealers and car thief rings. Be prepared to confront bank robbers and terrorists once you're selected for SWAT team assignment. Only the better player will be able to reach Delta Force and tangle with a criminal element threatening national security.
