ARMY DAYS

INSTRUCTIONS FOR ARMY DAYS

Turn on computer. Insert cassette and press SHIFT and RUN/STOP together to load. Connect the light gun to joystick port 1.

Weapons skills are the vital part of any solder's training - and ARMY DAYS puts you right in the middle of a tactical fire-arms course. Your ballistic skills will be tested to the full in this challenge of accuracy and quick reactions.

DAY 1 TARGET PRACTISE

Shoot the targets for points, whilst being careful not to miss too many - otherwise your game will be over.

DAY 2 CLAY PIGEON SHOOT

Shoot the clays as they are across the screen. Be accurate enough to shoot the required number and then you will be able to progress to the next stage.

Score 250 points for each clay that is shot.

DAY 3 OUTDOOR TARGET PRACTISE

Shoot the targets as they appear for 250 points each. Clear the whole screen and you will be awarded a bonus of 100 points.

Increasing brightness control on the monitor may improve the accuracy of the gun.
